

## The One-touch, Portable, Battery-operated Cellular Phonebook Backup Accessory

Losing a cellular phone is a nightmare that millions of people face all around the world. For the 99% of cellular phone users who don't currently backup their cellular phonebooks, there is no quick and simple solution to restoring their contacts when the inevitable disaster of phone loss occurs...

portable  
solution

that was then,  
this is NOW...

Introducing Backup-Pal™, the world's first easy-to-use, portable cellular phonebook backup solution. NO personal computer, Software installation or a monthly subscription fee required!!!

Your  
**Cellular  
Phonebook**  
is now **BACKED UP!**

battery operated

## Product Highlights

- **High Product Demand**

Upon losing a cellular phone, 67% of cell phone users are more concerned with losing their phonebook contacts over replacing the lost cell phone handset

- **Simple and Reliable**

One-touch Backup. One-touch Restore. Very easy to use!

- **Saves Frustration**

Eliminate the aggravation of manually re-entering contacts one letter at a time into a new phone

- **Quick and Easy Transfer**

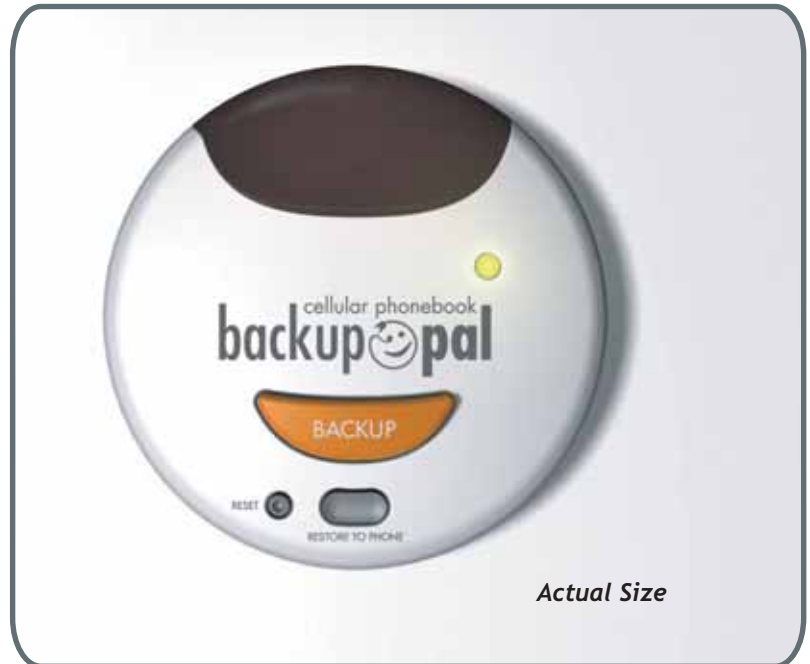

Transfer contacts from one cell phone to another, regardless of the cell phone manufacturer or wireless carrier

- **No Thinking Required**

NO PC use required. NO software installation required. NO expensive cable purchase required

- **Safe and Secure**

You stay in control of your backed-up contacts
